

Cutasept® colorfree

For skin disinfection. Ready-to-use-liquid.

Characteristics

- Fast acting and comprehensive
- Excellent skin tolerance
- Ready-to-use
- Colorfree solution

Application

For disinfecting the skin before injections, punctures, blood sampling and surgical procedures.

Directions for use

Cutasept® colorfree should be used concentrated and undiluted. Skin disinfection: The area of skin to be disinfected is thoroughly soaked with the product using gauze or a swab so that no untreated parts remain. The product is left to dry on the disinfected skin according to exposure times.

Composition

Ethanol 70 % (CAS: 64-17-5); Biphenyl-2-ol 0,2 % (CAS: 90-43-7); Alkyl-(C12-C16)-Dimethylbenzylammoniumchlorid 0,1 % (CAS: 68424-85-1).

Microbiology

Bactericidal (MRSA), Fungicidal, Tuberculocidal, Virucidal (also HBV / HIV inactivating effect).

Application	Exposure time	
Before injections, blood collection, punctures	30 sec	
Disinfection of the surgical skin surface low in sebaceous glands	2x1 min	
Disinfection of the surgical skin surface rich in sebaceous glands	10 min	
Antimicrobial spectrum	Testing method	Exposure time
Bactericidal (MRSA)	EN 1276, EN 13727	30 sec
Fungicidal	EN 1650	30 sec
Tuberculocidal	EN 14348	1 min
Limited spectrum of virucidal activity (incl. HBV and HIV)	EN 14476	1 min

Chemical-physical data

Appearance	colorfree solution
Odor	alcoholic
Density (20 °C)	approx. 0,87 g/cm ³
Flash point (DIN 51755)	23° C
Durability after opening	3 years
Classification	Flam.Liq. 2; Aquatic Chronic 3
